Date of birth	11/23/1951	**Unit**	Orthopedics 6 North
Admitted	10/14/2026	**Discharged**	10/17/2026
Attending	Michael Okafor, MD (Orthopedic Surgery)	**Preferred language**	English

Why you were in the hospital

Procedure: Right total hip replacement (arthroplasty) on 10/14/2026 for severe osteoarthritis. Surgery went well. You are walking with a walker.

Hospital course (for your care team)

74F s/p elective R THA (posterior approach) 10/14 under spinal anesthesia, EBL 300 mL. POD1 Hgb 9.8 from 12.1, asymptomatic, no transfusion. Pain controlled on scheduled APAP and PRN oxycodone. Mobilizing WBAT with RW and PT, cleared for home with HHPT. Hx hypothyroidism on levothyroxine. ASA 81 held during apixaban VTE prophylaxis. Dressing C/D/I.

Your medications

START taking these medications

Apixaban (Eliquis) 2.5 mg tab: 1 tab PO BID x 35 days for DVT prophylaxis. Last dose 11/20/2026. Do not skip doses.

Acetaminophen (Tylenol) 500 mg tab: 2 tabs PO q8h scheduled for pain. Max 3,000 mg/24 h from all sources.

Oxycodone 5 mg tab: 1 tab PO q6h PRN severe pain not relieved by acetaminophen. Max 4 tabs/day. No driving or alcohol.

Docusate sodium (Colace) 100 mg cap: 1 cap PO BID while taking oxycodone, for constipation.

Ondansetron (Zofran ODT) 4 mg: 1 tab SL q8h PRN nausea.

CONTINUE taking these medications

Levothyroxine 75 mcg tab: 1 tab PO QAM on an empty stomach, 30-60 min before breakfast.

Resume your other home medications as before.

Vitamin D. Take as directed.

STOP taking these medications

Aspirin 81 mg tab: HOLD while on apixaban unless instructed by surgeon to resume.

Activity and wound care

Hip precautions for 6 weeks: do not bend your hip past 90 degrees, do not cross your legs, and do not twist on the operated leg. Use your walker at all times.

Keep the incision dressing clean and dry. You may shower after 5 days with the dressing covered. No baths, hot tubs or swimming until cleared by your surgeon.

Follow-up appointments

Orthopedics, Dr. Michael Okafor: Thursday 10/29/2026 at 1:00 PM, Maplewood Orthopedic Clinic, Building B. Staple removal and wound check.

Home physical therapy: the home health agency will call you within 48 hours to set up visits. If no one calls, phone (203) 555-0166.

When to get help

Call the Orthopedic Clinic at (203) 555-0160 if: the incision becomes red, warm, or drains fluid; you have a fever above 101.5 F; your pain gets worse and is not controlled by your medicines.

Call 911 or go to the emergency room if: you have chest pain or sudden shortness of breath; one calf becomes swollen, red or painful; you have black or bloody stools or vomit blood; your hip feels like it popped out or you cannot put any weight on the leg.
